EDUCATION

B.Tech, Computer Science and Engineering (Applied Mathematics), CR Rao AIMSCS, University of Hyderabad — 2024 - 2028

AI and Machine Learning Program (24 weeks), iHub-Data, IIIT Hyderabad — Feb 2026 - Aug 2026

EXPERIENCE

Virtual Intern, Infosys Springboard Internship 7.0 (Batch 5), Infosys Springboard — Oct 2026 - Present

Data Analyst Intern, Seaweedz Energy Private Limited — Jul 2026 - Present

- Data analysis with SQL and Python.

PROJECTS

HUPP-LID: Language Identification for Code-Mixed Text | Python, PyTorch, MuRIL, XLM-R — Research

- Token-level, transliteration-aware language ID for Hindi, Urdu, Punjabi and Pashto code-mixed text, with an ambiguity label for Hindi/Urdu overlap and a measured human agreement ceiling.
- Baseline ladder from dictionary lookup and char n-gram SVM to BiLSTM, XLM-R, MuRIL and Glot500, plus a gated model combining surface and phonetic token representations.

Quantum Error Correction ML Decoder | Python, PyTorch, Stim, BiLSTM

- BiLSTM neural decoder trained on error-syndrome data simulated with Stim; built in stages, repetition code first, then the surface code.

PersonaLearn: ML Learning Path System | Python, XGBoost, K-Means, Streamlit, Render

- Personalised learning paths for 32,000+ students using K-Means and XGBoost, with 3 learner personas and at-risk student monitoring.
- Deployed a live cohort analytics dashboard on Render (IBM SkillsBuild x CSRBOX Boot Camp 2026 project).

DocChat and rag-api: Document Q&A | Python, FAISS, OpenAI, FastAPI, Streamlit

- RAG system with PDF/text upload, sentence-aware chunking, OpenAI embeddings and FAISS retrieval; every answer traces back to its source chunks.

Seamless Minds: Transcription and Translation App | JavaScript, Python, Whisper

- Transcribes uploaded files, video links and live recordings; translates across languages, exports SRT and PDF reports, and scores output with WER and BLEU.

SKILLS

Languages: Python, Java, C, SQL, R, JavaScript, TypeScript, Dart, Ruby, HTML/CSS

AI/ML: NLP, LLMs, Generative AI, RAG, Deep Learning, Machine Learning, Transformers, Prompt Engineering, Computer Vision

Libraries and tools: PyTorch, Scikit-learn, XGBoost, Pandas, NumPy, Matplotlib, FAISS, Flask, FastAPI, Streamlit, Next.js, React, Flutter, SQLite

Core CS and platforms: Data Structures and Algorithms, DBMS, Operating Systems, Linux, Git/GitHub, Docker (basics), AWS, Azure ML, Vercel, Render

TRAINING AND CERTIFICATIONS

- **IBM SkillsBuild**: AI Strategy and Business Intelligence Internship with CSRBOX and AICTE (Mar - Apr 2026); Generative AI Boot Camp; Build an AI Agent
- **AWS**: AI Practitioner Challenge (Udacity, 2026); Solutions Architecture Job Simulation (Forage, 2025)
- **McKinsey.org** Forward (2026); **Google** AI Essentials (2024); **Microsoft**: Transformers and LLMs in Azure Machine Learning (2025)
- **Infosys Springboard**: Pragati: Path to Future, Cohort 6 (2025); Applied Generative AI; NLP Foundation
- **VaultofCodes**: AI and Prompt Engineering Internship (1 month, Nov 2025)
