EDUCATION

B.Tech, Computer Science and Engineering (Applied Mathematics) | 2024 - 2028
CR Rao Advanced Institute of Mathematics, Statistics and Computer Science, University of Hyderabad

AI and Machine Learning Program (24 weeks) | Feb - Aug 2026
iHub-Data, IIIT Hyderabad

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, C, SQL, HTML/CSS

CS fundamentals: Data Structures and Algorithms, DBMS, Operating Systems

AI/ML: NLP, LLMs, Generative AI, Deep Learning, Prompt Engineering, Transformers, RAG, BiLSTM

Development: React, Three.js, Flutter, FastAPI, Streamlit, SQLite, FAISS, Git/GitHub, Linux, Docker (basics)

PROJECTS

PersonaLearn - Student Analytics | Python, XGBoost, K-Means | Live | Code
- Built student risk predictions with XGBoost and three learner clusters with K-Means using historical OULAD data.
- Deployed a dashboard with cohort analytics, learner profiles, and rule-based study plans on GitHub Pages; developed through the IBM SkillsBuild x CSRBOX Boot Camp.

Quantum Error Correction ML Decoder | Python, PyTorch, Stim, BiLSTM | Live | Code
- Trained BiLSTM decoders on simulated error-syndrome data for 3-, 5-, and 7-qubit repetition codes.
- Built a browser lab to inject errors, inspect parity checks, and compare decoder predictions; surface-code support is planned.

DocChat and rag-api - Document Search and Q&A | Python, FastAPI, FAISS | Live | Code
- Created a browser-based document search app with PDF.js, BM25 retrieval, and IndexedDB storage; the live app returns source excerpts.
- Built a separate Python RAG prototype using sentence-aware chunking, OpenAI embeddings, and FAISS retrieval, linking answers to source chunks.

HUPP-LID - Code-Mixed Language Identification | Python, PyTorch, MuRIL, XLM-R
- Developed token-level language identification for Hindi, Urdu, Punjabi, and Pashto code-mixed text, including an ambiguity label for Hindi/Urdu overlap.
- Implemented dictionary and character n-gram baselines alongside BiLSTM and transformer models, with surface and phonetic token representations.

Client Websites - Academies and Boutiques | HTML, CSS, JavaScript | Fashion Queen Collections
- Designed and built responsive websites for academies and boutiques using HTML, CSS, and JavaScript.
- Created a boutique website to showcase Fashion Queen Collections, with links for customer enquiries.

EXPERIENCE

Virtual Intern - Infosys Springboard Internship 7.0, Batch 5 | Oct 2026 - Present
Assigned project: AI-Based Visual Risk and Compliance Intelligence System (ongoing).

TRAINING AND CERTIFICATIONS

IBM SkillsBuild / CSRBOX / AICTE: AI Strategy and Business Intelligence Internship | Mar - Apr 2026

AWS: AI Practitioner Challenge (Udacity, May 2026); Solutions Architecture Job Simulation (Forage, Jul 2025)

McKinsey.org Forward (Jun 2026); **IBM SkillsBuild:** Intelligent by Design: Build an AI Agent (Feb 2026)

Infosys Springboard: Applied Generative AI (Dec 2025); Natural Language Processing Foundation (Jul 2025)

Google: AI Essentials (Oct 2024); **Microsoft:** Transformers and LLMs in Azure Machine Learning (Aug 2025)
